## Appendix 10: Draft GTP Stages of Development

St	ages of Do	evelopment
	Stage 0 Mobilisation	Preparatory work including assembling project teams, communicating the main aims of the GTP process, establishing what evidence is available and required.
	Stage 1 Evidence Analysis	Identifying themes and areas of focus. Gathering evidence and identifying gaps. Analysing evidence to gain a strategic impression of growth and transport related issues and exploring specific issues at local level.
	Stage 2 Strategy Development	Using evidence to develop a strategy to guide the development of schemes and actions, including an identification of key outcomes that need to be achieved and by when.
	Stage 3 Scheme Development	Using the evidence base and strategy to develop packages of transport-led, multi-modal schemes and actions aimed at addressing the key challenges, and an indicative programme for their delivery.
	Stage 4 Consultation	Assembling the GTP documentation for public consultation. Opportunity for focused discussions with stakeholders and user/community groups on specific proposals.
	Stage 5 Finalisation & Adoption	Collating feedback from the consultation, making updates to the GTP, finalising documentation and seeking approval prior to adoption.
