**ST ALBANS DISTRICT COUNCIL TREE WORKS  
APPLICATIONS REGISTERED WEEK ENDING 17/01/2019**

**Reference:** TP/2019/0018 CA **Ward:** Marshalswick South  
**Received:** 11/01/2019  
**Proposal:** Reduce Cypress tree to a stump as it only has one live branch and owner wishes to grow a climber up it. Reduce Eucalyptus tree by approx. 2m to bring it within the curtilage of the property so it can be more easily maintained. Reduce Silver Birch by approx. 30% to bring the crown to within approximately 2m of where previously branches have been removed. This is all to reduce the loading on the main stem as the stem decays near the previous reduction points.  
**Address:** 64 Warwick Road St Albans Hertfordshire AL1 4DL

**Applicant:** Mr John Leary-Joyce St Albans AL1 4DL  
**Agent:** Mr Simon Gray St. Albans Tree & Garden Services Ltd

**ST ALBANS DISTRICT COUNCIL TREE WORKS  
APPLICATIONS REGISTERED WEEK ENDING 17/01/2019**

**Reference:** TP/2019/0020 TPO 1077

**Ward:** St Peters

**Received:** 13/01/2019

**Proposal:** T19 Beech. 2x upright limbs in top of canopy to be removed. Previous rubbing limbs has caused large wound with decay. If failed would fall onto neighbour's roof. 2 limbs will require 8m removing back beyond decay at a suitable prune point. T17 Holm Oak. Prune north side of crown by up to 3m to reduce weight on leeward side of leaning tree. To reduce weight on leeward side towards building to address balance. Limbs have become extended growing towards light, 2 large stems recently failed on this side, this will reduce end loading on laterals. Present dimensions. height 20m . Spread N. 7m. S. 3m. E 3m W 4m. After. Height 20m Spread N. 4m S. 3m E. 4m W. 4m.

**ST ALBANS DISTRICT COUNCIL TREE WORKS  
APPLICATIONS REGISTERED WEEK ENDING 17/01/2019**

**Reference:** TP/2019/0025 CA

**Ward:** Harpenden West

**Received:** 15/01/2019

**Proposal:** Referring to the sketch plan, we intend the following works with your permission:

1. Remove Ash (Orange Dot). Overgrows the park and creates excessive shading. Right on the South boundary.
2. Remove 7 Apple trees (Purple dots) on the south boundary (We will replace the Ash and Apple trees with a double staggered row of Beech hedging starting with rootball specimens at 2m height.)
3. Remove 2 small Apple trees (Purple dots) to the west of the pond. They have been cleared of Ivy and although they have recovered, they are growing at a low angle and provide no amenity. They also drop fruit on the lawn which attracts wasps and pests which half-eat which is a problem with young children.
4. Clear the north east boundary which is scrub, dead previously cut trees covered in ivy and ground ivy and brambles. Remove a dead Cherry tree that is leaning on the gate. Replant the entire corner (which ends at the driveway gate) with a Holly hedge - single row of 2m high rootball. By planting Holly in this way, the entire North and East boundary will match with a Holly hedgeline which is native and rural and pleasing to passers-by and neighbours.

Background (i) We purchased the property 18 months ago and have had a chance to live in the house and enjoy the garden in all seasons. The previous owners left the garden to become wildly overgrown - literally meters thick ivy and brambles at the back between the Apple trees as marked. Once the ivy and brambles had been cleared there were a number of dead trees fallen (now cleared) and limbs fallen off trees still alive but with Ivy attached. As can be seen in supporting photographs, the metal-grilled fence facing the park is now very open and there is little privacy. This part of the park is used heavily for football matches every weekend. The neighbours have a beech hedge so this plan is in keeping. At the front, the north-east corner simply needs to be cleared to start again. There are no vegetation of any amenable value. It looks like a m
