

# The Equality Diversity and Inclusion Partnership

## Priorities for 2025-2026

**Engaging better with children and young people  
(children and young people feeling engaged,  
accessing services and influencing change).**

**Tackling exclusion in the move to digital services for  
those who do not have access to computers, mobile  
phone or laptops or may struggle to use digital devices.**

**Ensuring communications are accessible for all  
(enabling residents across all demographics to engage  
with information shared in the District).**

### **An Age Friendly District**

St Albans City and District is also working on becoming more age friendly, i.e. enabling older people to have a voice and engage in services. We are aiming to join the UK Network of Age-friendly Communities in 2025.

### **Supporting our partners in Hertfordshire Public Health to deliver better health outcomes for all**

The Health and Wellbeing profile for St Albans has identified specific health needs of dementia, anxiety and 'low happiness' in the district. We will support improving outcomes for people in these groups.
