

### **Hertfordshire County Council Highways Tree felling list, September / October 2025**

Sometimes it is necessary to remove trees that are dead, dying, diseased or have significant structural weaknesses. When the trees are felled, usually the stumps are left in-situ at about a metre high so they are clearly visible. The stumps are then ground out in the subsequent months.

Before any work starts Officer will check the tree and recommendation mark it with a cross and attach a felling notice. The contractor will also check each tree for nesting birds. If active nests are present the work will be postponed if it is safe to do so.

[FAQs](#)

Tree Number	Work order	Road Name / Area	Location on road	HCC Division	SADC Ward	Species	Reason for Removal	Type of Work	Checked on Site	Work Target Month
14730	HW-2526-006 - Fells	Abbey Avenue, Verulam, St Albans	Outside 21	St Albans South	Verulam	Betula pubescens (Downy Birch)	Due to poor structural/physiological condition	Planned	In progress	September / October
