

St Albans Solar Streets

COMMUNITY SOLAR PROJECT

CLEAN ENERGY - LOWER BILLS - CUT CARBON EMISSIONS

St Albans City and District Council are working in partnership with PV installer IDDEA Ltd, to help homeowners and businesses access discounted solar panels. For every installation completed, a contribution will be made to a community energy fund. This will be used to install solar panels to local community buildings.

Find out how you can save over 20% on your solar installation as part of this community project:

BOOK YOUR FREE HOME SURVEY

One of IDDEA's team will visit your home, design your solar system and show you the financial benefits and the carbon emission savings. Established in 2008, IDDEA have installed over 800 solar projects across the South and are committed to supporting communities to take action against climate change.

This service is FREE and WITHOUT OBLIGATION and performed in line with COVID-19 guidelines.

installation

IS MY ROOF SUITABLE?

South facing (East & West may be viable) with a pitched roof. Concrete or clay tiles, or slates. Even a small roof can be considered for solar panels!

JOIN THE CONVERSATION

To find out more, come along to a monthly online webinar and ask questions with others in your community. View dates for live streams and previous recordings here:
